INVESTMENT THESIS

Scarce late-stage access: one of few humanoid platforms deploying in 2026;
De-risked syndicate: tier-one backers (OpenAI, EQT, Tiger, Samsung) with follow-on across three rounds.
Hardware + AI moat: proprietary direct-drive actuators (lowest non-Chinese BOM) plus end-to-end embodied AI on home data.
Unique position in the B2C robotics market
Optionality: further primary rounds, strategic acquisition or IPO.
